How To Manage the Construction Process

- Significant information regarding how to manage a project from award to final completion, with harmony between GC and Sub.
- Items covered include but not limited to the following: contractual language, who is authorized on change orders, the value of pre-construction meetings to produce a successful project.
- Learn General Contractor pet peeves with subcontractors in the construction process.
- Extensive Q & A session, with opportunity for attendees to submit written questions for response from the GC panel.
